

## Final project report

Project ID	2004/2.06
Title	Osservatorio Meteo-Climatologico Antartico (Meteo-Climatological Observatory)
Principal investigator	Andrea PELLEGRINI
Institution	ENEA
Email	andrea.pellegrini@enea.it
Duration	3 years
Assigned funding	200.000,00 Euro

### Activities and results

Systematic meteorological observations are made since 1987 in the area of Terra Nova Bay; in 1989, a ground station for High Resolution satellite imagery has been installed at the Italian Antarctic station. At present, a network of 15 automatic weather stations, two radiosounding stations and two receiving stations for NOAA, DMSP and SeaWIFS satellites have been installed.

This Research Project, therefore, continued the climatological monitoring of the area where the activities of the Italian Antarctic Program take place. Some activities are co-operative efforts with other Research Projects: the Observatory cooperates with Glaciologists to study the mass balance of the Antarctic ice cap and the atmospheric forcing of the active layer of permafrost. In addition, new instruments have been tested and some verification of numerical weather forecasting models has been done.

Surface weather stations and radiosounding stations are part of the Antarctic Basic Synoptic Network and of the Antarctic Basic Climatological Network of the World Meteorological Organization (WMO). The Observatory contributes to the SCAR MET-READER database.

By means of ENVISAT and AMSR-E satellite data, detailed sea-ice maps are produced in near-real time as an aid to navigation.

Great attention is paid to making data available to the broader science community through the Observatory's web site [www.climantartide.it](http://www.climantartide.it).

**Task 1** Continuous data acquisition and maintenance, year-round, of the Automatic Weather Stations Network (16 stations), 2 radiosoundings/day (summer only) at Mario Zucchelli Station, and 1 radiosounding/day year-round at Concordia Station.

Operation and HW/SW maintenance of satellite imagery ground stations, acquisition, processing and storage of imagery. Analysis and mapping of sea-ice and polynya's extent by means of AVHRR and SSM/I imagery.

**Task 2** In co-operation with Res.Proj. 2005/5.2 (Glaciology): measurement of the intensity of snow drift on the Antarctic Plateau.

**Task 3** Input of observed data into the databases of the World meteorological Organization. Validation of data and input into the web-accessible database [www.climantartide.it](http://www.climantartide.it). High resolution maps of sea-ice by means of ENVISAT and AMSR-E data.

**Task 4** Prototype of innovative humidity sensor.

**Task 5** Development of an innovative support system for meteorological equipment in extreme environment (patent ENEA RM2007U000244).

## **Products**

### **A – papers in scientific magazines**

1. **Bove, R., P. Grigioni**, "Convective Snowfalls Linked to the Interaction of a Boundary-Layer Front with a Mesoscale Cyclone Near Terra Nova Bay, Antarctica" [Boundary-Layer Meteorology Volume 131, Number 3 / June, 2009](#) DOI 10.1007/s10546-009-9374-6
2. **Claudio Scarchilli, Massimo Frezzotti, Paolo Grigioni, Lorenzo De Silvestri, Lucia Agnoletto e Stefano Dolci**, "Extraordinary blowing snow transport events in East Antarctica" Climate Dynamics, Published on line June 2009 DOI 10.1007/s00382-009-0601-0

### **Research units**

1. Principal investigator: Paolo GRIGIONI  
ENEA C.R. Casaccia,  
Via Anguillarese 301 00060 ROMA  
Tel.: 0630486595 Fax: 0630486678  
e-mail: paolo.grigioni@enea.it

List of investigators in the Research group:

Name	Role	Institution
Paolo GRIGIONI	Researcher	ENEA
Lorenzo DE SILVESTRI	Technician	ENEA
Umberto GENTILI	Researcher	ENEA
Andrea PELLEGRINI	Researcher	ENEA
Marco PROPOSITO	Res.Grant	ENEA

2. Principal investigator: Flavio Parmiggiani  
ISAC-CNR  
via Gobetti 101, 40129 Bologna  
Tel.: 051 6398009 Fax: 0516398132  
e-mail: f.parmiggiani@isac.cnr.it

List of investigators in the Research group:

Name	Role	Institution
F. Parmiggiani	Researcher	ISAC-CNR
L. Pignagnoli	Researcher	ISAC-CNR
