

Final project report

Project ID	2004/7.06
Title	<i>Cosmic Rays in Polar Areas and Associated Terrestrial Phenomena</i>
Principal investigator	STORINI Marisa
Institution	INAF/IFSI-Roma
Email	storini@ifsi-roma.inaf.it
Duration	3 years
Assigned funding	130 000,00 Euro

Activities and results

The aim of the project was (i) to continue the detection of the nucleonic component of cosmic rays in the Latin-American sector by using the neutron monitors located in Antarctica (King George Island; **LARC subproject**) and Los Cerrillos (Santiago of Chile; **OLC subproject**); (ii) to develop new neutron detectors for polar areas.

The Antarctic Laboratory for Cosmic Rays (LARC subproject; location: $\sim 62^{\circ}\text{S} - 58^{\circ}\text{W}$; 40 m a.s.l.) is based on a Chile/Italy collaboration started in November 1993 to run a 6NM-64- $^{10}\text{BF}_3$ detector. Nowadays, also an Italian 3NM-64- ^{3}He detector (assembled and checked for its performance in Rome) is at work since January 2007. The obtained data [(URL: http://www.dfi.uchile.cl/ec_web/htm/datos.htm)] are used to investigate solar extreme events, such as energetic solar particles in the terrestrial environment and induced effects.

The Los Cerrillos Observatory (OLC subproject; location: $\sim 33^{\circ}\text{S} - 289^{\circ}\text{E}$; 570 m a.s.l.) is the result of a Chile/Italia collaboration via a PNRA/INACH agreement. Instruments sent to Santiago of Chile during the 2000 year allowed the build up of a 6NM-64- $^{10}\text{BF}_3$ at Los Cerrillos Observatory [(URL: http://www.dfi.uchile.cl/ec_web/htm/datoscl.htm)].

The combined data of both observatories allows to check on hourly basis the incoming radiation in the energy range of 3-10 GeV. Moreover, the identification of Ground Level Enhancements (known as GLEs; generally detected on 5-min basis) permits to estimate the ionization produced by the associated solar protons, particularly in polar areas where the variability of several minor atmospheric components is closely related (see references reported in the next sections).

The design of a new modular detector has been performed by using a helium counter (LND 25373 type). The detector configuration has reached the length of 216 cm with a mass of ~ 800 Kg. It is realized with 23 modules and it is closed by a plate at the both ends. The frontal plate has a hole for the tube and a bay for the electronics box fixed on the head of the counter, whereas the rear one is plane. Each module is composed by a polyethylene round shaped frame (outer reflector) with a tongue and groove joint to lock into one another. The central hole of the frame encloses a lead ring (producer) housing an interlocking polyethylene allow cylinder (inner moderator) which is the modular slot of the proportional counter. Four tie-rods block in the whole frame preventing any movement of the single elements which are boxed up with a strict mechanical accuracy.

Despite the overall weight, only one operator is required to assemble the whole modular detector, as the modular design made each loose component reasonably light, since the weight of the heaviest element (lead ring) is about 23 Kg. If PNRA will continue to support this kind of research, the build-up of the detector and test of its performance will be the next step for the use in polar areas.

E – thematic maps

--

F – patents, prototypes and data bases

1. *Database updated to December 2007: 3* (LARC_6NM-64_¹⁰BF₃ ; LARC_3NM-64_³He ; OLC_6NM-64_¹⁰BF₃) + **2** (LARC_GLEs; OLC_GLEs).
2. Storini, M., Signoretti, F., Diego, P., *Testing a new Italian cosmic-ray detector based on ³He counters*. Report IFSI-2009-6, February 2009.
3. Storini, M., Re, F., Signoretti, F., *LARC NORMALIZED DATA 1991-2007*. Report IFSI-2009-8, March 2009.

G – exhibits, organization of conferences, editing and similar

1. 37th COSPAR Scientific Assembly – D23 Energetic Solar Particle Events – Past, Present, Future/ Joint with E33, July 2008. Member of the Organizing Committee: M. Storini (IFSI-Roma/INAF).
2. M. Storini – 2008/2009 Guest editor for Adv. Space Res. (Vol. 44 - Elsevier Journal).

H - formation (PhD thesis, research fellowships, etc.)

1. *UNISiena, Scuola di Dottorato di Ricerca in Scienze Polari* – Piero Diego, *Ricorsività nel mezzo interplanetario e climatologia dedotta da misure terrestri*, XIX Ciclo, IFSI-Roma/INAF: M. Storini (tutor of PhD thesis).
2. *UNISiena, Scuola di Dottorato di Ricerca in Scienze Polari* – Alessandro Damiani, *Effects of energetic solar particles on ozone and minor atmospheric components inside the polar regions*, XX Ciclo, IFSI-Roma/INAF: M. Storini (tutor of PhD thesis).
3. Research Contract (Assegno di ricerca) - Dr. Piero Diego: *Rivelatori terrestri per la radiazione cosmica – uso in aree polari/subpolari*.
4. Research Contract (Assegno di ricerca) – Dr. Alessandro Damiani: *SEP (Particelle Energetiche Solari) in ambito polare*.

Research units

CAN-STO.1: Head: Marisa STORINI (check of the experimental work and obtained data from neutron monitors; research for Solar-Terrestrial Relations/Space Weather)

Nome/Name	Qualifica/Role	Istituto/Institution
Marisa STORINI	Coordinator/Senior Scientist	IFSI_INAF
Piero DIEGO	Research Contract/PNRA	IFSI_INAF
Francesco RE	Technician	IFSI_INAF
Fabrizio SIGNORETTI	CTER	IFSI_INAF
Maria Paola ALLEMANDI	CTER	IFSI_INAF
Mario PARISI	Associated Professor	UNIRoma3

Programma Nazionale di Ricerche in Antartide (PNRA)

CAN-STO.2: *Head:* Fabrizio SIGNORETTI (design and experimental test for a new compact detector)

Nome/Name	Qualifica/Role	Istituto/Institution
Fabrizio SIGNORETTI	Head /CTER	IFSI_INAF
Piero DIEGO	Research Contract/ PNRA	IFSI_INAF
Francesco RE	Technician	IFSI_INAF
Marisa STORINI	Senior Scientist	IFSI_INAF
Stefano MASSETTI	Collaborator	IFSI_INAF

CAN-STO.3: *Head:* Monica LAURENZA (database for Sun-Earth-Heliosphere System)

Nome/Name	Qualifica/Role	Istituto/Institution
Monica LAURENZA	Head /Researcher	IFSI_INAF
Maria Paola ALLEMANDI	CTER	IFSI_INAF
Marisa STORINI	Senior Scientist	IFSI_INAF
Alessandro DAMIANI	Research Contract/ PNRA	CNR_IDAC
Giovanni MORENO	Associated Professor	UNIRoma1
Angela GARDINI	Research Contract	IFSI_INAF
Karel KUDELA	Associated Professor.	SAV-Kosice
Julius SYKORA	Senior Scientist	SAV-T.Lomnica

Date: 30 April 2010
